TRTL

ODYSSEY
#1 PUTTER ON TOUR.

The Odyssey TRTL is an all-new shape designed to deliver exceptionally high MOI in a modern, confidence-inspiring design. It's offered with our new Tour Track alignment for players who prefer a long, uninterrupted alignment line. Every model features our new Ai-Star insert, a dual layer construction engineered to deliver consistent ball speed across the face and improve forward roll while delivering the iconic Odyssey feel.

FEATURES & BENEFITS

SHAPE
This all-new mid-mallet shape is designed for easy alignment and maximum MOI in a clean, confidence-inspiring. It reflects the modern mallet trend favored by Tour players and amateur golfers alike, and has already generated significant buzz since it's debut on Tour.

MULTI-MATERIAL CONSTRUCTION
The body is crafted from steel and finished in a premium black PVD. The shell is made from a lightweight ABS Thermoplastic Polymer, and the sole is lightweight aerospace-grade aluminum. This advanced multi-material construction allows weight to be pushed to the perimeter of the putter to maximize MOI for greater stability and forgiveness.

ENGINEERED TO SIT SQUARE
The refined rake and camber work together to help the head sole flush to the ground and settle into naturally square alignment, giving players a more confident setup and a more consistent start to every stroke.

ADJUSTABLE PERIMETER WEIGHTING
Four discrete weights positioned in the corners of the putter head allow us to optimise the head weight and CG for different hosels offered while maximizing MOI.

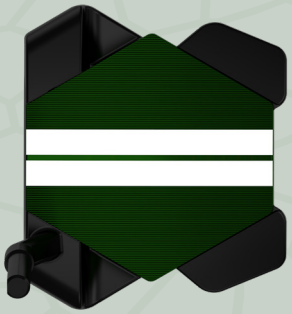

AI-STAR INSERT
Designed using Artificial Intelligence, this advanced dual-layer insert has an aluminum inner layer with a firmer urethane layer on the outside striking surface. This design delivers consistent ball speed and enhanced forward roll across the face with the feel Odyssey inserts are known for.

F.R.D. GROOVE DESIGN
This Forward Roll Design groove design is deeper and more aggressive with a 19° slope. It works in conjunction with the dual layer design to improve forward roll up and down the face.

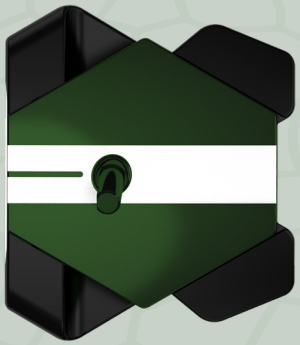

NEW TOUR PISTOL GRIP
This new grip was developed from Tour feedback, it has crisp edges that fit comfortably in your hands and give you a better awareness of where the putter face is throughout your stroke.

BLACK SL 120 SHAFT
Our Tour preferred SL 120 shaft available in a beautiful black PVD with a green shaft band to complement the colouring of the head.

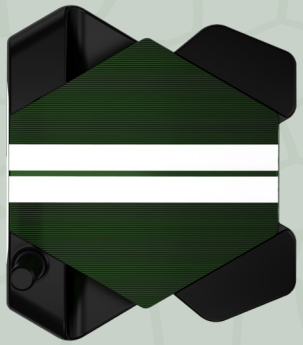

CRUISER AND BROOMSTICK OPTIONS
For players seeking the added stability of longer and heavier setups, these feature a heavier head, heavier shafts, and longer grips.
